Dear Mike,

**White Rock Wind Farm – Project Approval MP10_0160 – Stage 1
Update on Notification of Commencement of Operations (Condition D5)**

This letter follows the WRWFPL letter of 31 January 2018 notifying the imminent commencement of operations for White Rock Wind Farm Stage 1 (WRWF). As indicated in that letter, the actual timing was subject to completion of residual pre-operations activities. This letter now advises that all residual pre-operations activities have been completed and WRWF has commenced full operations from 19 March 2018.

As per the previous correspondence, the operations will be undertaken in accordance with the WRWF Stage 1 Operation Environmental Management Plan (OEMP) approved by Department of Planning and Environment (DPE) on 14 September 2017.

The Environment Protection Licence, EPL 20665 (initially issued 27 April 2016) has also been varied by EPA during 2017 to address the WRWF Stage 1 operational requirements.

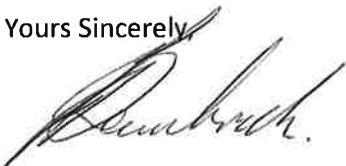

A Pre-Operations Compliance Report (POCR) January 2018 also accompanied the notification of 31 January 2018.

It is also advised that arrangements for Operational Noise Compliance Monitoring are being progressed. This will commence from 3 April 2018, after landowner, consultant and wind farm operator coordination has been addressed and written approval of Test Plan obtained from DPE and EPA.

This letter completes notification requirements of Condition D5 in relation to commencement of full wind farm operations.

Should you have any questions in relation to this matter or require further information, please do not hesitate to contact me as follows: email jeffbembrick@goldwindaustralia.com or mobile phone: 0499156665.

Yours Sincerely,

Jeff Bembrick,

Development Compliance Manager on behalf of White Rock Wind Farm Pty Ltd
